

Adeyinka Oresanya

📞 +2347030075967 ✉ adeyinkaoresanya@gmail.com  [LinkedIn](#)  [GitHub](#)  [Medium](#)

Backend engineer with experience building and maintaining production-ready web applications and APIs using modular, maintainable software architecture. Demonstrable competence working in distributed and multidisciplinary environments through roles across international private equity, management consulting, IT and open source sectors. Strong communicator who values pragmatic delivery, inclusive systems design, and sustainable technical decisions.

TECHNICAL SKILLS

- **Backend:** Node.js (JavaScript & TypeScript), Python, PHP, RESTful APIs
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Cloud & Infrastructure:** DigitalOcean, AWS, Docker, CI/CD
- **Version Control & Collaboration:** Git, GitHub Projects

WORK EXPERIENCE

Backend Developer (Contract)

Aforiti (UK)

September 2024 – Present

- Designed and implemented RESTful APIs to power core financial health assessment workflows, ensuring data integrity and seamless frontend integration.
- Built and deployed a Node.js microservice for automated document generation (PDF) and file processing, improving system efficiency and user-facing reporting capabilities.
- Built CI/CD pipelines and deployment workflows, ensuring reliable staging and production releases.

Key Impact: Delivered a scalable digital platform replacing a manual Excel-based workflow, projected to improve operational efficiency by over 90% while establishing a maintainable technical foundation.

Backend Developer

FireSwitch Technologies (Nigeria)

December 2023 – September 2024

- Designed and implemented backend services to automate commission and bonus calculations for sales agents, translating complex business rules into reliable, testable logic.
- Developed structured database schemas and financial computation workflows to ensure accuracy and transparency in payout processes.
- Built RESTful APIs to support internal dashboards and reporting tools used by management and finance teams.
- Implemented validation layers and error-handling mechanisms to safeguard financial data integrity.
- Collaborated with stakeholders to refine business requirements and convert manual spreadsheet-driven processes into an automated digital system.

Key Impact: Reduced manual commission processing time, minimized calculation errors, and improved operational transparency in sales performance tracking.

Data Manager

Katalista Ventures (Vilnius, Lithuania)

December 2021 – August 2023

- Co-developed and designed a digital evaluation system to assess how startups implement the Triple Top Line sustainability framework in their businesses.
- Built a no-code database to consolidate organisational data from fragmented Google Sheets, improving data accessibility and ensuring continuity during staff transitions.
- Collaborated with cross-functional stakeholders to standardize workflows and institutionalize data-driven decision-making practices.

Key Impact: Strengthened organizational resilience by centralising data, reducing operational risks and accelerating evidence-based decision-making.

OPEN - SOURCE CONTRIBUTIONS

Lead Maintainer and Badging lead

CHAOSS DEI Badging Program

March 2024 – Present

- Lead ongoing refactoring efforts on the Badging API to reduce technical debt, improve overall architecture, and standardize backend patterns.
- Oversee efforts to increase adoption and community engagement of the Project DEI Badging initiative through strategic direction, training and documentation support to the outreach team.
- Improved issue triage, contribution guidelines, and review processes to make collaboration clearer and more efficient.
- Collaborate with the DEI Working Group to translate evolving metrics and policy changes into structured technical workflows
- Document system workflows and technical decisions to support current and future contributors.

Key Impact: Successfully issued 100+ Event DEI badges through a transparent peer-review system while improving technical standards and reducing review delays.

EDUCATION

Diploma, Backend Engineering	2023
AltSchool Africa, Nigeria	
Micro-Masters, Data Science	2021
Turing College, Lithuania	
Ph.D, Agricultural Extension and Rural Development	2021
University of Ibadan, Ibadan, Nigeria	
M.Sc., Agricultural Extension and Rural Development	2014
University of Ibadan, Ibadan, Nigeria	
B.Agric., Agricultural Extension and Rural Development	2010
Obafemi Awolowo University, Ile-Ife, Nigeria
